

Coconut

sugar

No	Parameter	Details
1	Name	Coconut Sugar / Coconut Palm Sugar
2	Scientific Name	Cocos nucifera
3	HS CODE	1702.90.90
4	Price	CALL
5	Stock	CALL
6	MOQ	1 MT
7	Payment Term	20 % Advance (TT), 80 % LC At Sight

Physical Characteristics

- Appearance: Granular form, light to dark brown color
- Texture: Coarse to fine granules

Chemical Composition

- Sucrose content: ~70%
- Contains trace minerals like potassium and magnesium

Culinary Benefit

- Enhances both sweet and savory dishes with a unique caramel flavor.
- Serves as a healthier alternative to refined sugars due to its lower glycemic index.
- Contains essential nutrients such as potassium, magnesium, zinc, and iron.
- Versatile in various culinary applications, including baking, sauces, and beverages.

Traditional Medicinal Benefits

- Known to aid digestion and support gut health due to its prebiotic fiber content (inulin).
- Contains antioxidants that help combat oxidative stress in the body.
- May assist in managing blood sugar levels due to its low glycemic index.

Modern Medicinal Benefits

- Provides a more balanced source of energy compared to regular sugars, potentially aiding in weight management.
- Supports immune function through its nutrient-rich profile.

Note: For detailed information on physical characteristics and chemical composition, we invite prospective buyers to conduct independent testing. You may visit our facility to observe the processes and collect samples for laboratory analysis, or we can send samples to you for further testing, with shipping costs borne by the buyer. Alternatively, you may engage SGS services at your own expense. Prospective buyers are also welcome to observe the quality control process in our warehouse through to the completion of stuffing.
